

Ohio Revised Code

Section 1533.49 Size of mesh and twine used in crib nets, trap nets, and fyke nets.

Effective: October 20, 1994

Legislation: Senate Bill 182 - 120th General Assembly

The dimensions and specifications for nets provided in this section shall apply except as otherwise provided by division rule.

The meshes of the back of the crib or car of all crib nets, fyke nets, or trap nets used in fishing in this state shall be hung on a third so as to hang squarely, shall be made of twine not heavier than eighteen thread, and shall measure not less than two and five-eighths inches stretched mesh as found in use or possession, measured on the bar. The meshes shall extend from the top to the bottom of the crib or car of the nets. No person shall place a screen or apron of any kind over the two and five-eighths inches mesh which in any way will tend to obstruct the passage of fish through the meshes.

No person shall use a trap net, crib net, or fyke net without having a spreader bar in the back of the crib or car thereof and so placed that the meshes of the back of the crib or car will hang squarely.

No person shall bring a crib net, fyke net, or trap net ashore with the back of the lifting car removed.

No person shall fail to comply with any provision of this section or division rule adopted pursuant thereto.
