

Ohio Revised Code

Section 3506.19 Disability-accessible electronic voting machine to be required at each polling place.

Effective: April 6, 2023

Legislation: House Bill 281

On and after the first federal election that occurs after January 1, 2006, unless required sooner by the Help America Vote Act of 2002, each polling location shall have available for use at all elections at least one direct recording electronic voting machine or marking device that is accessible for individuals with disabilities, including nonvisual accessibility for persons who are blind and visually impaired, in a manner that provides the same opportunity for access and participation, including privacy and independence, as for other voters.
