

Ohio Administrative Code Rule 111:3-10-09 Cybersecurity.

Effective: [November 20, 2023](#)

(A) Print vendors shall comply with all requirements found in the current secretary of state's security supplement to ballot printing contracts.

(B) Print vendor shall establish and enforce internal policies and procedures to secure computer and network systems involved in the storage, use, and transmission of board of elections data to prevent unauthorized access, manipulation, use, or destruction of such data. The print vendor shall provide its policies and procedures to the board of elections or the secretary of state immediately upon request. The secretary of state may require a print vendor to amend its internal policies and procedures described herein and may revoke any approvals granted under this chapter should the print vendor refuse to amend its policies and procedures.

(C) Print vendor shall transmit and store all data associated with the board of elections only through servers and other equipment located in the United States.
