Ohio Administrative Code

Rule 111:3-9-04 Escrow procedures.

Effective: January 25, 2016

(A) Consistent with the guidelines and standards of the U.S. election assistance commission, computer software developers must place in escrow with an independent escrow agent a copy of all source code and related documentation, together with periodic updates as they become known or available.

(B) Documentation referred to in paragraph (A) of this rule shall include a system configuration.

(C) Source code documentation referred to in paragraph (A) of this rule Code shall include all relevant program statements in low- or high-level languages.

(D) The independent escrow agent is subject to the approval of the secretary of state and must agree to all requirements of state law.
