

Ohio Administrative Code

Rule 1301:7-9-03 Reporting requirements for hazardous substances and list of hazardous substances.

Effective: September 1, 2017

(A) Purpose.

For the purpose of prescribing rules pursuant to section 3737.88 of the Revised Code, the state fire marshal hereby adopts this rule to establish reporting requirements for underground storage tank systems that contain hazardous substances and to list those substances which are hereby identified as hazardous substances. This rule is adopted by the state fire marshal in accordance with Chapter 119. of the Revised Code and shall not be considered a part of the "Ohio Fire Code".

(B) Definitions.

For the purpose of this rule:

(1) "Release of a hazardous substance" means:

(a) Any spilling, leaking, emitting, discharging, escaping, leaching or disposing of a hazardous substance from an underground storage tank system into the groundwater, a surface water body, subsurface soils or otherwise into the environment;

(b) Any spilling, leaking, emitting, discharging, escaping, or disposing of a hazardous substance into groundwater, a surface water body, subsurface soils or otherwise into the environment while transferring or attempting to transfer a hazardous substance into an underground storage tank system; or

(c) Contamination of subsurface soils or groundwater on the UST site by a hazardous substance found and confirmed through laboratory analysis of samples from the UST site.

(2) "Suspected release of a hazardous substance" means evidence of a release of a hazardous substance obtained through one or more of the following events:

AUTHENTICATED,
OHIO LEGISLATIVE SERVICE
COMMISSION
DOCUMENT #245872

- (a) The monitoring results from a release detection method required by rule 1301:7-9-07 of the Administrative Code that a release of a hazardous substance may have occurred unless:
 - (i) The monitoring device is found to be defective, and is immediately recalibrated or replaced, and additional monitoring does not confirm the initial result; or
 - (ii) In the case of inventory control, a second month of data does not confirm the initial result;
 - (b) Unusual operating conditions observed by the owners and operators unless system equipment is found to be defective but not leaking, and is immediately repaired or replaced. Such unusual operating conditions shall include, without limitation, the erratic behavior of hazardous substance dispensing equipment, the sudden loss of hazardous substances from the UST system or an unexplained presence of water in the tank.
 - (c) The presence of free hazardous substances discovered during removal of an UST system or part thereof or in an excavation on the UST site or on property nearby the UST site;
 - (d) The discovery of hazardous substance vapors within or along building foundations or other subsurface manmade structures such as building foundations, basements, pedestrian tunnels, utility vaults, sewer lines, or the like, or in a drinking water well located on the UST site or on property nearby the UST site;
 - (e) The presence of free hazardous substances in a monitoring or an observation well located on the UST site or on property nearby the UST site;
 - (f) The presence of hazardous substances observed on a surface water body located on the UST site or on property nearby the UST site suspected to have arisen from a release from an UST system; or
 - (g) The presence of free hazardous substances discovered in an UST secondary containment system on the UST site.
- (C) Reporting of releases of a hazardous substance and suspected releases of a hazardous substance.

(1) Owners and operators shall report a release of a hazardous substance or suspected release of a hazardous substance to the state fire marshal and the local fire department within twenty-four hours of discovery by the owner or operator. Spills or overfills of twenty-five gallons or less that do not reach a surface water body and that are cleaned up within twenty-four hours need not be reported.

(2) Compliance with paragraph (C)(1) of this rule does not relieve the owners and operators from complying with any other applicable federal, state, or local reporting requirements, laws, or regulations.

(D) Hazardous substances shall include a mixture of a hazardous substance and petroleum which is not contained in a petroleum UST system.

(E) The substances listed in the following table are hazardous substances except that any listed substance regulated as a hazardous waste under Chapters 3745-50 to 3745-69 of the Administrative Code shall not be considered a hazardous substance for the purposes of this chapter. The numbers to the right of the substances are the chemical abstracts service registry numbers for the substances. Entries on the table written in all capital letters represent generic categories and any substance that belongs to such a category, whether listed individually or not, is considered to be a hazardous substance.
