

Ohio Administrative Code Rule 1501:21-15-07 Emergency action plan.

Effective: June 27, 2024

An emergency action plan shall be required for all class I, II and III dams and all class I and class II levees. The emergency action plan for all class I structures shall include but not be limited to an inundation map of the critical routing reach. An inundation map may also be required for class II and III dams as designated by the chief. The required detail of this map depends upon the complexity of the downstream hazard and shall be acceptable to the chief. Three copies of the emergency action plan are to be submitted to the chief for approval upon the completion of construction or as otherwise directed by the chief. The chief may require additional copies as necessary. The plan is to also be provided in a digital file format acceptable to the chief.
