

Ohio Administrative Code

Rule 3349-9-20 Computer equipment and software support.

Effective: February 14, 2019

(A) Purpose

The purpose of this rule is to define standards for hardware, software, and support at the university.

(B) Scope

The scope of this rule includes all personnel at university.

(C) Definitions

(1) "Authorized User" or "User" is a person who has been provided with a username and password, for their use only through legitimate university process after verification of identification by the university's information technology department.

(2) "Information Technology" is the administrative unit responsible for supporting university owned or leased hardware and software.

(3) A computer lab is defined as three or more computers used by faculty, staff, or students for general use, research, in a classroom setting, or as a component of a class.

(D) Rule

In order to make the best use of university resources, standard hardware and software specifications have been developed and are defined in the information technology standards and timelines. Employees are responsible for familiarizing themselves with this document. Non-standard hardware/software will not be supported by information technology, nor will computers that are not owned by university.
