

## Ohio Administrative Code Rule 3379-7-07 Advisory panels.

Effective: February 21, 2019

---

(A) The council or the executive committee from time to time may create an advisory panel in any designated art field or other relevant professions. Each panel shall perform such duties as shall be specified by the council, including submitting from time to time recommendations to the council for courses of action designed to promote the functions and activities of the council. Each panel shall be advisory only and shall not have authority to commit the council financially or otherwise without the council's express consent.

(B) A list of potential advisory panel members shall be compiled for council approval. The council will review potential panel members as submitted by the chair and director who, in turn, have had input from staff and the arts field or other relevant professions.

(C) Appointments to each advisory panel shall be equal in duration to that of the grants to be awarded by that panel, or for one year, whichever is longer. An advisory panel member may be reappointed but such reappointment must be approved by council and shall not result in such member serving for more than four consecutive meetings of the same panel. After an advisory panel member serves four consecutive meetings of the panel, such member may not be appointed to any advisory panel again until two years have elapsed.
