

Ohio Administrative Code Rule 3701-84-20 Patient selection criteria.

Effective: May 15, 2023

- (A) An extra-renal, solid organ transplant service must use written patient selection criteria in determining a patient's suitability for placement on the waiting list or a patient's suitability for transplantation.
 - (B) Patient selection criteria must comply with the organ procurement and transplantation network (OPTN) organ allocation priorities and be based on objective medical criteria.
 - (C) Patient selection criteria must include a psychosocial evaluation.
 - (D) Patient selection criteria must ensure a fair non-discriminatory distribution of organs and be in compliance with centers for Medicare and Medicaid services (CMS) and OPTN oversight.
 - (E) Documentation of the patient selection criteria utilized must be included in the patient's medical record.
-
