

## Ohio Administrative Code Rule 3701:1-37-19 Maintenance and testing.

Effective: November 3, 2019

---

(A) Each licensee subject to rules 3701:1-37-14 to 3701:1-37-22 of the Administrative Code shall implement a maintenance and testing program to ensure that intrusion alarms, associated communication systems, and other physical components of the systems used to secure or detect unauthorized access to radioactive material are maintained in operable condition and are capable of performing their intended function when needed. The equipment relied on to meet the security requirements of this chapter must be inspected and tested for operability and performance at the manufacturers suggested frequency. If there is no suggested manufacturers suggested frequency, the testing must be performed at least annually, not to exceed twelve months.

(B) The licensee shall maintain records on the maintenance and testing activities for three years.
