

Ohio Administrative Code

Rule 3701:1-44-04 License requirements and types of licenses.

Effective: December 10, 2015

(A) A person subject to the rules in Chapter 3701:1-44 of the Administrative Code may not receive title to, own, receive, possess, use, transfer, provide for long-term care, deliver or dispose of byproduct material or residual radioactive material as defined in rule 3701:1-44-01 of the Administrative Code or any source material after removal from its place of deposit in nature, unless authorized in a specific or general license issued by the director under the rules in Chapter 3701:1-44 of the Administrative Code.

(B) Licenses for source material and byproduct material are of two types: general and specific. Licenses for long-term care and custody of residual radioactive material at disposal sites are general licenses. The general licenses provided in Chapter 3701:1-44 of the Administrative Code are effective without the filing of applications with the department or the issuance of licensing documents to particular persons. Specific licenses are issued to named persons upon applications filed pursuant to the rules in Chapter 3701:1-44 of the Administrative Code.
