

## Ohio Administrative Code

### Rule 3701:1-48-06 Limits on external radiation levels from storage containers and source changers.

Effective: [March 22, 2007](#)

---

The maximum exposure rate limits for storage containers and source changers are two millisievert (two hundred millirem) per hour at any exterior surface, and 0.1 millisievert (ten millirem) per hour at one meter from any exterior surface with the sealed source in the shielded position.
