

Ohio Administrative Code Rule 3701:1-49-02 Purpose and scope.

Effective: [October 8, 2007](#)

Chapter 3701:1-49 of the Administrative Code covers requirements for the issuance of a license authorizing the use of licensed materials including sealed sources, radioactive tracers, radioactive markers, and uranium sinker bars in well logging in a single well. This chapter also prescribes radiation safety requirements for persons using licensed materials in these operations. The provisions and requirements of this chapter are in addition to, and not in substitution for, other requirements of Chapter 3748. of the Revised Code and rules promulgated thereunder. The requirements set out in this chapter do not apply to the issuance of a license authorizing the use of licensed material in tracer studies involving multiple wells, such as field flooding studies, or to the use of sealed sources auxiliary to well logging but not lowered into wells.
