

Ohio Administrative Code

Rule 3745-28-07 Infectious waste host fees.

Effective: January 31, 2022

(A) A municipal corporation or township in which an off-site infectious waste treatment facility or an off-site solid waste incinerator which also treats infectious wastes is located may levy an infectious waste host fee of not more than five dollars per ton on the treatment of infectious wastes at an off-site infectious waste treatment facility or an off-site solid waste incinerator which also treats infectious wastes located within the boundaries of the municipal corporation or township regardless of where the wastes were generated. The legislative authority of a municipal corporation or township may levy infectious waste host fees under this paragraph by enacting an ordinance or adopting a resolution establishing the amount of infectious waste host fees. Upon so doing, the legislative authority shall mail a copy of the ordinance or resolution by certified mail or any other form of mail accompanied by a receipt to the director, the board of health of the health district having jurisdiction within the municipal corporation or township, and the owner or operator of each treatment facility located in the municipal corporation or township.

(B) If a township or municipal corporation has enacted an ordinance or adopted a resolution levying infectious waste host fees on the off-site treatment of infectious wastes as authorized by section 3734.024 of the Revised Code, then the owner or operator of the off-site infectious waste treatment facility or off-site solid waste incinerator which also treats infectious wastes shall, as a trustee of the township or municipal corporation, commence collection of the fee on the sixtieth day after the effective date of the ordinance or adoption of the resolution.

(C) The owner or operator of an off-site infectious waste treatment facility or an off-site solid waste incinerator which also treats infectious wastes shall prepare and file monthly infectious waste host fee returns with the treasurer or with the clerk. These infectious waste host fee returns shall indicate, at a minimum, the total tonnage of infectious wastes treated at a facility and the total amount of infectious waste host fees collected under section 3734.024 of the Revised Code. Monthly infectious waste host fee returns shall be filed on a form prescribed by the municipal corporation or township. Not later than sixty days after the end of the month to which such a return applies, the owner or operator shall remit to the treasurer or to the clerk the return for that month together with

the infectious waste host fees that were required to be levied on all infectious waste treated during the month as indicated on the infectious waste host fee return. All infectious waste host fee returns shall be notarized.

If the infectious waste host fee return and infectious waste host fees are not remitted within sixty days of the last day of the month to which the return applies, the owner or operator shall pay an additional fifty percent of the amount of the infectious waste host fees for each month or fraction thereof that the fees were late. The late fee shall continue to accrue each month until the infectious waste host fees are remitted. The late fee shall be calculated using the following formula: total late fee due = (amount of infectious waste host fees that are late) x (.5) x (number of months that the infectious waste host fees are late, expressed as a whole number or fraction).

(D) Moneys received by the treasurer shall be paid into the general fund of the municipal corporation. Moneys received by the clerk shall be paid into the general fund of the township. The treasurer or the clerk, as appropriate, shall maintain separate records of the moneys received from the infectious waste host fees levied under this rule.

(E) Moneys collected under this rule shall be used exclusively for the following purposes:

(1) Providing financial assistance to the board of health of the health district having jurisdiction within the municipal corporation or township for the enforcement of the infectious waste provisions of Chapter 3734. of the Revised Code and rules, orders, and terms and conditions of permits and licenses adopted or issued thereunder.

(2) Providing local emergency response services in connection with such a facility and the transportation of infectious wastes to such a facility.

(3) Providing funding to a municipal corporation or township for conducting environmental monitoring programs in connection with off-site infectious waste treatment facilities located within the municipal corporation or township.

(F) If an off-site infectious waste treatment facility is located in more than one township or municipal corporation, each may adopt an infectious waste host fee equal to the fraction of the land
