

Ohio Administrative Code Rule 3745-67-52 Waste analysis.

Effective: January 7, 1983

(A) In addition to the waste analyses required by rule 3745-65-13 of the Administrative Code, the owner or operator shall analyze a representative sample of waste from each incoming movement before adding the waste to any existing pile, unless

(1) The only wastes the facility receives which are amenable to piling are compatible with each other, or

(2) The waste received is compatible with the waste in the pile to which it is to be added.

(B) The analysis conducted shall be capable of differentiating between the types of hazardous waste the owner or operator places in piles, so that mixing of incompatible waste does not inadvertently occur. The analysis shall include a visual comparison of color and texture.

[Comment: as required by rule 3745-65-13 of the Administrative Code, the waste analysis plan shall include analysis needed to comply with rules 3745-67-56 and 3745-67-57 of the Administrative Code. As required by rule 3745-65-73 of the Administrative Code, the owner or operator shall place the results of this analysis in the operating record of the facility.]
