

Ohio Administrative Code

Rule 3745-81-29 Monitoring of consecutive public water systems.

Effective: June 20, 2024

When a public water system supplies water to one or more other public water systems, the director may modify the monitoring requirements imposed by this chapter to the extent that the interconnection of the systems justifies treating them as a single system for monitoring purposes. Any modified monitoring shall be conducted pursuant to a schedule specified by the director and concurred with by the administrator of the U.S. environmental protection agency.
