

## Ohio Administrative Code

### Rule 3772-11-02 Approval of table games and publication of table game information.

Effective: May 2, 2022

---

(A) A casino operator must not operate a table game or table game mechanism unless the table game and the table game mechanism have been approved by the executive director. The executive director may require an independent testing laboratory evaluation of the proposed table game and table game mechanism before it is approved for use or at any time thereafter.

(B) A casino operator must submit internal controls for the operation of any table game. The controls must include:

- (1) Procedures for dealing the game;
- (2) Procedures for handling game irregularities; and
- (3) Procedures for collecting and paying wagers.

(C) The executive director may require a trial period to analyze the operation and performance of a table game and associated equipment in a live gaming environment. The conduct of the trial period will be subject to compliance by the casino operator with any conditions that may be required by the executive director, including duration of the trial.

(D) The casino operator must obtain written approval from the executive director before installing or removing a table game or associated equipment from the gaming floor.

(E) A casino operator must not operate any table game or associated equipment that becomes unsuitable for operation at a casino facility.

(F) Payoff schedules must be worded in a manner that does not mislead the public.

(G) A casino operator must prominently post a copy of the game rules and payoff schedules on its
