

Ohio Administrative Code Rule 4123:1-7-04 Passageways.

Effective: January 1, 2025

- (A) Passageways shall be sufficiently firm to withstand the travel for which they are intended and be kept clear of obstructions.

 - (B) Passageways shall be no less than twenty-four inches wide where no more than two employees manually carry molten metal.

 - (C) Passageways shall be no less than five feet wide where more than two employees manually carry molten metal.

 - (D) Passageways where molten metal is transported in truck, sulky, or manually operated monorail ladles shall be no less than twenty-four inches wider than the extreme width of such ladles.

 - (E) Passageways used for parallel travel of truck ladles or manually operated monorail ladles shall be no less than twice the width necessary for a one-ladle operation.
-
