

## Ohio Administrative Code Rule 4123:1-7-07 Scrap breakers.

Effective: January 1, 1981

---

- (A) The breaking of scrap or castings by the use of a demolition weight inside the foundry building during regular operating periods is prohibited.
- (B) Where a demolition weight is used to break skulls and scrap outside the foundry building, the operation shall be performed in a restricted or guarded area identified by appropriate signs and away from employees not involved in demolition work.
-
