

## Ohio Administrative Code

### Rule 5180:2-42-66 Administrative procedures for comprehensive health care for children in placement.

Effective: July 15, 2024

---

(A) The early and periodic screening, diagnosis, and treatment (EPSDT) program is a federally mandated program of comprehensive preventive health services available to medicaid-eligible individuals from birth through age twenty years. In Ohio, the program is called healthcek and is administered by the county department of job and family services (CDJFS). A healthcek screening examination or its equivalent constitutes comprehensive health care for all children in placement.

(B) The public children services agency (PCSA), private child placing agency (PCPA) or private noncustodial agency (PNA) is to develop written interagency procedures to implement comprehensive health care for children in placement between the CDJFS and custody holding agency, if applicable. Interagency procedures are to include documentation that the substitute caregiver has been informed of healthcek services and transportation services and the substitute caregiver has been provided a copy of the ODM 03528 "Healthcek and Pregnancy Related Services Information Sheet."

(C) The PCSA, PCPA or PNA is to review and amend the interagency procedures developed pursuant to paragraph (B) of this rule, as needed.
