

## Ohio Administrative Code Rule 901:1-19-02 Definitions.

Effective: June 30, 2016

---

### (A) Department

Department means the Ohio department of agriculture.

### (B) Official test

An official test for equine infectious anemia is a test conducted at a state or state-federal approved laboratory, which has been approved by the department. Any sample or material submitted for said test must have been obtained by a licensed and accredited veterinarian, or an employee of the Ohio department of agriculture, or an employee of the United States department of agriculture, veterinary services.

### (C) Report of official test

Any test for equine infectious anemia on a sample from an animal within the state of Ohio must be reported to the Ohio department of agriculture within seven days. The report must be on a form approved by the Ohio department of agriculture and shall provide:

- (1) Name and address of owner or bailee;
- (2) Location of animal, including county, of where the equine was when the sample was collected;
- (3) Date samples collected;
- (4) Date samples submitted; and
- (5) Identification of each equine sampled, including name, age, sex, color markings, and registration number or tattoo.

(D) Reactor or positive

Any animal with lab results that are positive on a confirmatory test at a state or state-federal approved laboratory.

(E) Suspect

Any animal demonstrating clinical evidence or symptoms of equine infectious anemia to a licensed accredited veterinarian or representative of the Ohio department of agriculture.

(F) Negative

Any animal classed negative to an official test.
