

Ohio Administrative Code Rule 901:1-19-07 Quarantine.

Effective: June 30, 2016

Control of exposed or infected animals and premises.

(A) Equidae found to be infected with or exposed to equine infectious anemia and any premises where such diseased animals are found or have been recently kept shall be quarantined.

(B) No equidae shall be brought to or removed from the premises so quarantined except as stipulated under written permission from the department.

(C) The department may release the equidae and the premises from quarantine if all quarantined equidae test negative to an official equine infectious anemia test at least sixty days after all positive equidae have been either disposed of or isolated as provided in rule 901:1-19-06 of the Administrative Code.
