

Ohio Administrative Code

Rule 901:11-2-30 Drying.

Effective: February 21, 2016

Each dryer should be operated at not more than the manufacturer's rated capacity for the highest quality dry product and consistent with the most efficient operation. This does not preclude the remodeling or redesigning of dryers after installation or after proper engineering. The dry products shall be removed from the drying chamber continuously during the drying process.
