

Ohio Administrative Code

Rule 901:5-2-08 Dry fertilizer storage and handling.

Effective: January 1, 1991

(A) Dry fertilizer materials and nonliquid fertilizer shall, if stored for more than thirty days in any calendar year, be stored inside a structure or device having a roof or cover, sidewalls, and a base sufficiently impermeable to prevent contact with precipitation and surface water.

(B) Dry fertilizer materials and nonliquid fertilizer stored for thirty days or less in any calendar year may be stored outdoors provided they are placed on a ground cover sufficiently impermeable to prevent contact with precipitation and surface water and completely covered with a waterproof tarpaulin.
