

Appendix A to rule 3745-266-100 of the Administrative Code

Lead-Bearing Materials That May Be Processed in Exempt Lead Smelters:

A. Exempt Lead-Bearing Materials When Generated Or Originally Produced By Lead- Associated Industries *

Acid dump or fill
solids Sump mud
Materials from laboratory
analyses Acid filters
Baghouse bags
Clothing (e.g., coveralls, aprons, shoes, hats, gloves)
Sweepings
Air filter bags and
cartridges
Respiratory
cartridge filters
Shop abrasives
Stacking boards
Waste shipping containers (e.g., cartons, bags, drums,
cardboard) Paper hand towels
Wiping rags and
sponges
Contaminated
pallets
Water treatment sludges, filter cakes, residues, and solids
Emission control dusts, sludges, filter cakes, residues, and solids from lead-
associated industries (e.g., K069 and D008 wastes)
Spent grids, posts, and
separators Spent batteries
Lead oxide and lead oxide
residues Lead plates and
groups
Spent battery cases, covers,
and vents Pasting belts
Water filter media
Cheesecloth from pasting
rollers Pasting additive bags
Asphalt paving materials

B. Exempt Lead-Bearing Materials When Generated or Originally Produced By Any

Industry Charging jumpers and clips
Platen abrasive
Fluff from lead wire and cable casings
Lead-based pigments and compounding pigment dust

* Lead-associated industries are lead smelters, lead- acid battery manufacturing, and lead chemical manufacturing (e.g., manufacturing of lead oxide or other lead compounds).
