

Ohio Revised Code

Section 4715.56 Dentist supervision of radiologic procedures.

Effective: October 20, 1994

Legislation: Senate Bill 191 - 120th General Assembly

A dental x-ray machine operator may perform radiologic procedures only if a dentist is providing direct supervision. Direct supervision does not require the dentist to observe each radiologic procedure performed by the operator, but does require that he be present at the location where the operator is performing radiologic procedures for purposes of consulting with and directing the operator while performing the procedures.
