

Ohio Revised Code

Section 4723.433 [Repealed effective 3/19/2015 by H.B. 394 and S.B. 276,
130th General Assembly] Written notice for Lyme disease test.

Effective: September 15, 2014

Legislation: House Bill 483 - 130th General Assembly

When an advanced practice registered nurse orders a test for the presence of Lyme disease in a patient, the nurse or nurse's delegate shall provide to the patient or patient's representative a written notice with the following information:

"Your health care provider has ordered a test for the presence of Lyme disease. Current testing for Lyme disease can be problematic and may lead to false results. If you are tested for Lyme disease and the results are positive, this does not necessarily mean that you have contracted Lyme disease. In the alternative, if the results are negative, this does not necessarily mean that you have not contracted Lyme disease. If you continue to experience symptoms or have other health concerns, you should contact your health care provider and inquire about the appropriateness of additional testing or treatment."

The nurse or nurse's delegate shall obtain a signature from the patient or patient's representative indicating receipt of the notice. The document containing the signature shall be kept in the patient's record.
