

Ohio Revised Code

Section 4731.51 Defining practice of podiatric medicine and surgery.

Effective: April 10, 2001

Legislation: House Bill 585 - 123rd General Assembly

The practice of podiatric medicine and surgery consists of the medical, mechanical, and surgical treatment of ailments of the foot, the muscles and tendons of the leg governing the functions of the foot; and superficial lesions of the hand other than those associated with trauma. Podiatrists are permitted the use of such preparations, medicines, and drugs as may be necessary for the treatment of such ailments. The podiatrist may treat the local manifestations of systemic diseases as they appear in the hand and foot, but the patient shall be concurrently referred to a doctor of medicine or a doctor of osteopathic medicine and surgery for the treatment of the systemic disease itself. General anaesthetics may be used under this section only in colleges of podiatric medicine and surgery approved by the medical board pursuant to section 4731.53 of the Revised Code and in hospitals approved by the joint commission on the accreditation of hospitals, or the American osteopathic association. The use of x-ray or radium for therapeutic purposes is not permitted.
